

Wellness & Activities

Our signature wellness program, *Soul Purpose*, embraces six areas that are critical to an individual's well-being: physical, intellectual, social, vocational, emotional, and spiritual activity. At American Orchards, we strive to create an inspiring, motivating, and supportive environment where our residents can truly thrive in both body and spirit.

Dining Experience

We take great pride in creating culinary options that are freshly prepared, high quality, healthy, and great tasting. We value residents independence and choice and recognize the importance of a customized and personal dining experience that is available anytime of day. We help our residents feel at home and make sure they enjoy each meal like it was their own home cooking.

Enriching Environments

From the design, layout, and functionality of our living spaces to our team member focus on resident choice and developing close, personal relationships with each resident, we have taken the principles that we believe constitute a genuine and complete person-centered care environment and applied them into every aspect of our community.

At American Orchards, we know that each resident has a story - one that's as colorful and unique as the life they've lived. Our mission is to provide a setting where our seniors receive the quality care they need in an environment that will truly inspire the next chapter in a meaningful life.

- 24/7 Video Monitoring in All Common Areas
- On-site Backup Power Generators
- Sophisticated Fire Safety & Alarm System

24-Hour Nurses

At American Orchards, we offer on-site, 24/7 licensed nursing coverage - this means no matter the time of day or night, weekends, holidays, or otherwise, we have a licensed nurse on-site to administer all medications, provide care, and properly manage critical situations.

We believe this extra measure of care can often times make a significant impact on our resident's quality of life and helps reduce the negative toll, both emotionally and physically, of unplanned hospital and emergency room visits.
