

PATHWAYS OF **PROMISE**

Memory Care

Our specialized memory care team is specifically trained to patiently and compassionately assist with **Alzheimer's Disease, Lewy Body, Frontotemporal,** and other forms of dementia. The American Orchards culture of caring pays tribute to our resident's life history, supports their strengths and challenges, and maintains dignity and independence.

Pathways of Promise, our exclusive dementia care program, focuses on four areas of resident wellness: cognitive function, social interaction, physical health, and spiritual well being. A highlight of this program is our needs-centric home model, which utilizes architectural planning and color psychology to create an environment that allows residents with similar types of dementia to better thrive alongside one another.
